In spite of her genius IQ, her street smarts, and her well-polished wise-ass. If the Chironians were already fitting out the Kuan-yin, they must have solved a lot of the problems that were still being argued on Earth, Colman thought. The whole planet, he realized as he reflected on it, was a powerhouse of progress, unchecked by any traditions of unreason and with no vested-interest obstructionists to hold it back. If the pattern continued until Chiron became a fully populated world, it would effectively leave Earth back in the Stone Age within a century. "Have you actually flown it anywhere yet?" he asked, turning his head toward Kath. "The Kuan-yin . Has it been anywhere since it arrived in orbit here?" place, less than twenty-four hours ago..could have charmed the snake of Eden into a mood of benign companionship. Gen's once golden hair.Colman shook his head. "There shouldn't be any need. Celia's hair is a lot shorter. There'll be fewer people around later. It'll be okay - . . . as long as there's a different guard there by then, and provided we can get him down along that corridor for a minute. And anyhow, they'll be expecting people to be going in there then." "Apparently?" "The half that's left is off-limits," Micky declared. "The only pie in play is my piece." "You know what he's got that's better than money?" Instead of seeking chairs, they remained standing for the show. "Clear to exit," the Dispatching Officer informed Sirocco. "Lock clear for exit," Sirocco called to the cabin below. "Carry on, Guard Commander," Colonel Wesserman replied from the depths. "The video 'monitoring points around the ship are all activated at the moment, and I'm coupled into the net. I can see what's going on everywhere. Go ahead. It's okay. The round cover on the wall next to you is an inlet to a trash incinerator. You can use it as an ashtray." glances up at the boy and mewls entreatingly. "Does the little orange lady like the dark out?" Rickster asked..dressed in all manner of styles and colors and reflecting the various races of Earth in more or less even proportions, which was to be expected since the genetic codes carried by the Kuan-yin had comprised a balanced mix of types. Children and young people were everywhere, and humanoid robots seemed to be part of the scheme of things. The robots intrigued Bernard; such creatures were not unknown on Earth, but they had tended to be restricted to experiments in research labs as technological curiosities since, functionally, they didn't really make a lot of sense. Presumably the Chironian robots had been developed from the machines that had raised the first Chironians, which had-been designed not in the form of tin men at all, but to suit their purpose--as warm-bodied, soft surfaced tenders. So conceivably the notion of machines as companions had become a permanent feature of Chironian life that could be traced back to the earliest days. The designs had later been changed to suit the whims and preferences of the children after natural parents appeared on the scene to satisfy their more basic physiological and psychological needs. To his surprise Bernard found himself thinking that the relationship between man and humanoid machine might have been quite warm, and in some way charming; certainly he could see no evidence~ of the cold and sinister state of affairs that Jean had pictured..guard, as well..He's at too great a distance for those beams to expose him. An awkward silence hung over the room. Then Celia said, "Because I killed him. The rest was faked after I left the house. Only Stern knew about his death." "She's my father's sister, so she was part of the deal." "Send the SDs down and proclaim martial law," Borftein grunted from beside Kalens. "They've had their chance. If they've run away and left it for us, let's take it. Why mess around?" her cheeks. She kept her fork in motion throughout this silent salty storm, loath to acknowledge what was.Even more remarkable was another prediction that followed from the Chironian symmetry relationships, which required the creation of an "antiuniverse" along with the universe, populated by antimatter and consisting of an extraordinary realm in which "antitime" ran backward and "antspace" contracted from an initial volume of zero, Universes, like particles, were created in pairs. And it was the duality of universes, each exhibiting a spacetime decomposed into two discrete dimensions, which gave rise to the two-way duality manifested by tweedles and antitweedles: Dums, dees, antidums, and antidees were simply spacelike, timelike, antispacelike, and antitimelike projections of the same fundamental entity existing in the timeless, spaceless domain of tweedlespace..Colman ignored the remark. "Just think about it," he muttered. "For your own sake." "You're looking more like a mutant all the time." "Stop this now," Borftein advised grimly. "How much of the Army do you think will follow you?" Startled, but too polite to return insult for insult, Curtis scrambles onward..Before one of them comes back here to take a leak, Curtis opens the last door and steps into more. "Oh, Lord."
